State Management	Provider, GetX
Backend & Cloud	Firebase (Notification, Auth)
Dev Tools & Platform	Git, Android Studio, Xcode, App Store & Play Store deployment
In-App & Integrations	In-App Purchases, AdMob, QR/Barcode Scanner, Document Scanning

WORK EXPERIENCE

Flutter Developer | Freelancing

June 2025 – Present

- Delivering end-to-end Flutter app development for clients across Gujarat and remotely.
- Integrated iOS-specific Firebase Notifications and App Store deployment for Dorm Hub app.
- Built iPrinter App for iOS & macOS with document scanning, photo/webpage printing, and in-app purchases.
- Handling full project lifecycle: requirement gathering, UI implementation, testing, and deployment.

Flutter Developer | Microweb Solutions, Ahmedabad

February 2023 – June 2025 (2 years 5 months)

- Built a Dairy Management System with customer subscription tracking and delivery provider management.
- Developed a school gate pass visitor management app with QR-based check-in/check-out.
- Created Sampark Setu — an API-driven school directory app for Ahmedabad.
- Maintained and enhanced a School Management System, optimising performance and adding new modules.

Flutter Developer | Zenzzzen Private Limited, Surendranagar

April 2022 – October 2022 (7 months)

- Developed Flutter applications with focus on state management and clean architecture
- Collaborated on UI/UX implementation and REST API integrations
- Developed a Flutter-based e-commerce application with order processing, and Firebase push notifications for Android and iOS.
- Built a Points & Reward Management System featuring QR/Barcode scanning, multi-user role, Firebase notifications, points tracking, and user/reward management modules

Android Developer | Shiv Computers, Surendranagar

June 2020 – March 2022 (1 year 10 months)

- Built Android apps including a SIM recharge platform (used by a group of people not for everyone).
- Points & Reward Management System, Integrated QR/Barcode scanner, Firebase push notifications, and user/reward management modules.
- Led development of a multi-role e-commerce app (Admin, Distributor, Wholesaler, Retailer) for a cosmetics brand

iOS Trainee | Moweb Technologies Private Limited, Ahmedabad

January 2019 – June 2019 (6 months)

- Gained foundational iOS development experience. built 'Let's Learn iOS' educational app (award-winning at Tech Expo 2K19)

FEATURED PROJECTS

iPrinter App (Flutter – iOS & macOS | Freelance)

- Cross-platform printing app for iOS and macOS supporting documents, photos, and webpages
- iOS version includes document scanning; in-app purchases implemented with limited free tier via API click counts
- Deployed on the App Store with platform-specific feature handling

Android Learner (Independent Project)

- Android Learner app helps to learn android with Java & Kotlin code examples.
- Free app with AdMob integration (July 2021 to July 2024)

Dairy Management System (Flutter – Android & iOS)

- Customer app: milk subscription management, order tracking, invoice/payment history, bottle return tracking
- Delivery app: delivery management with assigned customer orders and subscription details

Lead Management System (Flutter)

- Medical field CRM app with daily call management, customer tracking, critical info, and tour plan management

Points & Reward Management System (Flutter & Android)

- QR/Barcode scanning, push notifications (Firebase), address management with doorstep reward delivery
- App gallery with pricing, booklets, upcoming products, and points management

Sampark Setu *(Flutter)*

- API-driven school directory for Ahmedabad with filters: school type, board (GSEB/CBSE), medium, section
- Local favourites management using device storage
